

Analysis of Latent Trait Estimates
from Alternative Measurement Model Specifications

“Experiential Learning and Presidential Management of the U.S. Federal Bureaucracy: Logic and Evidence from Agency Leadership Appointments”

George A. Krause & Anne Joseph O’Connell

Listed below is a correlation analysis for the alternative measures grouped by factor type under various model specification (altering indicator variable covariates in the 3 latent factor/trait measurement model), factor specification (2 latent factors/traits versus 3 latent factors/traits versus 4 latent factors/traits), and estimation strategies (Bayesian versus ML-EM), as well as compared to the estimates that we have been using since March 2013 (these are denoted by the variable names in the “Appointments” paper database labels in Stata). These correlations appear below:

LOYALTY FACTOR(S): Please note that in “24” models, the **LOYALTY LATENT FACTOR/TRAIT IS split up between *Shared Preferences* for F1 (PARTY2B & MONEY) versus *Faalty* for F2 (ELECT1B, PAEPA2, GOVSERV, & PTYORG2).**

BASELINE: POSTERIOR MEDIAN: LOYALTY (BPMODEL 23: FBIT=100,000)

bm22fbf2sd	0.0351	0.0327	-0.0343	0.4614	1.0000	
bm24fb2f4sd	0.9299	0.9279	0.8992	0.5309	0.0204	1.0000

In relation to the baseline, the largest discrepancy case (0.0351) for *Policy Competence* is with respect to the “Combined” Competence supradimension in Models “22” (Bayesian). The Exploratory Factor Analysis (EFA) reveals that Competence falls on two separate dimensions that we have been working with. Also note, that dropping two indicator covariates in this latent trait dimension [**EDISS3B & ISSUECT**] also reduces the correlation between the revised reported and this model’s posterior SD to 0.5630. These models neither pass measurement nor validity tests noted in the *Measurement Model Appendix* document.

LOYALTY FACTOR(S): Please note that in “24” models, the **LOYALTY LATENT FACTOR/TRAIT IS split up between *Shared Preferences* for F1 (PARTY2B & MONEY) versus *Faalty* for F2 (ELECT1B, PAEPA2, GOVSERV, & PTYORG2).**
